# ANTHE MACHINE WORKS

COVINGTON, KENTUCKY

**T**ODAY . . . as for more than forty years . . . this company specializes in the manufacture of high grade Woodworking Cutters *only* . . . designing and producing all the many different types required for Furniture, Cabinet, Piano and Casket Factories, Planing Mills and Woodworking Manufactures in general.

These many years of experience have developed our facilities and craftsmanship to a high degree of efficiency . . . insuring the maximum of accuracy and service in every Cutter bearing the ANTHE die stamp. This insurance involves a full knowledge of steel and alloys, of heat-treating and tempering by the most modern methods, of exact finishing and attention to every detail.

Anthe Cutters are designed to accomplish most easily and effectively the particular work for which they are intended. For certain types of work, Cutters of high grade carbon steel, carefully heat-treated by expert in modern, pyrometer-controlled furnaces are recommended. For other purposes, where designs are fixed and maximum service is desired, we supply Cutters made of the best high-speed steels. They are heat-treated in accordance with manufacturers specifications and our own wide experience to give the longest and most efficient service it is possible to achieve.

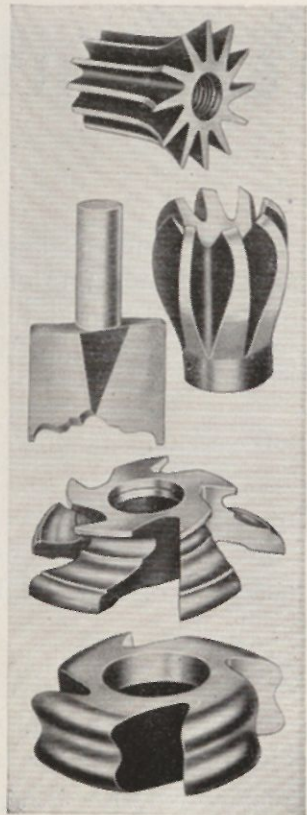

## GUARANTEE

The quality of the steel and workmanship in every Anthe Cutter is fully guaranteed.

We will replace, entirely free of additional cost, any of our Cutters sent to us for examination, which by expert analysis, proves faulty in either respect.

● PRICE LISTS are issued currently on certain standard classifications of Anthe Cutters. We will be pleased to keep you informed, offer suggestions on your cutting problems and work with you in every possible way. Write us freely.

## Send us your drawings and specifications for price quotations

Whenever your requirements indicate, let us submit cost estimates and offer recommendations on problems of design, kind of steel to use, etc. Your inquiries and requests will receive immediate and interested attention.

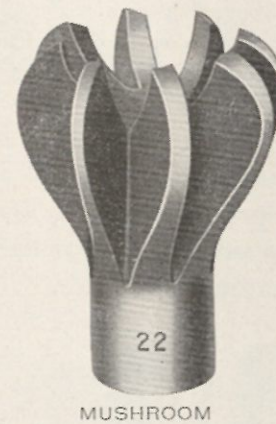

Naturally, we cannot begin to illustrate nor describe every type of Woodworking Cutter we make or for which a need may develop. When in doubt, get our recommendations and prices.

### ● SHIPMENTS ON ALL ORDERS made within ONE WEEK following receipt of final instructions . . .

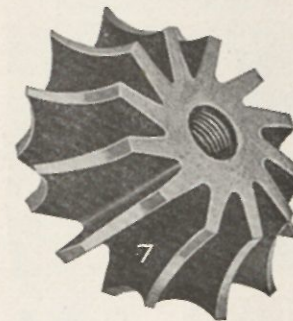

We are equipped to give the quickest service without the least sacrifice of quality. Many orders delivered in considerably less than a week. Send us your "hurry up" specials!

### Lowest Prices for Guaranteed Quality

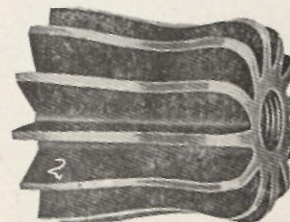

Exceptional facilities and experience enable us to produce small or large, simple or difficult orders at lowest cost efficiency. You pay no premium for the superiority insured in all Anthe Cutters.
