

New Licking Bridge Stands On the Foundations of Its Predecessors

"'Was Your Faithful Servant of Yesteryear'"

"'My Sins of Old Are Dedicated To Your Progress'"

The above photograph shows a view of the old covered bridge, as it appeared from "The Point" at the foot of Main Street. The picture was taken a number of years ago, and forms a part of an interesting collection of landscape scenes, belonging to E. C. Hill, of the C. F. Hill Company, of this city. At the time this picture was taken, the bridge was in a good state of repair. It had deteriorated somewhat at the time the structure burned, and a number of boards had fallen off the sides. Mr. Hill loaned the Outlook this photo for use in connection with our story of the bridge.

This picture shows the new steel bridge, taken from the foot of the old Goshawk Creamery building, in Shoemaker's lane. It was snapped by a Outlook photographer. The reader will observe a part of a ferry showing at the left of the picture. When the picture was taken, the workers had not removed all the form from the Falmouth side of the river. Note the solid construction of the concrete pier and abutments. The court-house tower and the town-clock may be seen in the background of the picture.

It is Banned!
The wonderful new steel bridge spanning Licking River is a reality. A dream come true. A great mass of metal and concrete, yet within a few feet of the old bridge, with all of its details of architecture, with all of its details of construction, with all of its details of design, with all of its details of building, with all of its details of the hands of humanity and its various contrivances, designed to withstand the ravages of time.

The bridge was made of iron and steel, and was built by the Falmouth Bridge Company. It was built on the foundations of the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge. It was built in the same place as the old bridge, and was built in the same place as the old bridge.

What the Caraman Saw When Old Bridge Collapsed

The above photograph shows a scene on Second Street, a few minutes after the wooden covered bridge that spanned Licking River fell into the stream. The background shows the smoke and steam rising from the steamers. A large crowd gathered at the bridge to view the ruins, and only a few of the people standing in front of the camera are shown in the picture. The picture was taken September 21, 1926, the day the bridge burned.
