

J.W.

M.

POST OFFICE DEPARTMENT
OFFICE OF THE
FOURTH ASSISTANT POSTMASTER GENERAL
WASHINGTON

DIVISION OF TOPOGRAPHY

Apr. 21/07.

Sir:

In order that this office may determine, with as much accuracy as possible, the relative positions of Post Offices, so that they may be correctly delineated on its maps, please carefully answer the questions below, and furnish the diagram on the other side, returning the same as soon as possible, verified by your signature and dated.

Very respectfully,

C. A. Raw.

Fourth Assistant Postmaster General.

To POSTMASTER AT

Mason
Grant Co., formerly Gouges
N.Y.

The (P. O. Dept.) name of my Office is *Mason*

If the town, village, or site of the Post Office be known by another name than that of the Post Office, state that other name here: *None*

My Office is situated in *N* part of *None* Township, or in *None* quarter of Tract No. *None* Township, County of *Grant* State of *N.Y.*

The name of the most prominent river near it is *None*

The name of the nearest creek is *Cash Creek*

My Office is *None* miles from said river, on the *None* side of it, and is *7* miles from said nearest creek, on the *E* side of it.

My Office is on Mail Route No. *None*

My Office is a Special Office supplied from *C.S.R.R.* miles distant.

The name of the nearest Office on my route is *None* and its distance is *None* miles, by the traveled road, in a *None* direction from this, my Office.

The name of the nearest Office, on the same route, on the other side, is *South 7 Court* and its distance is *7* miles in a *S* direction from this, my Office.

The name of the nearest Office off the route is *Williamstown*, and its distance by the most direct road is *5* miles in a *N* direction from this, my Office.

My Office is at a distance of *7.0* miles from the track of the *C.S.R.R.* Railroad, on the *N* side of the railroad.

My Office is *7* miles, air-line distance, from nearest point of my County boundary.

(Signature of Postmaster) *J. C. Williams*

(Date) *4/20/07*

DIAGRAM, EXPLANATION, AND INSTRUCTIONS.

The dot in the center of the 1-mile circle represents the site of your office.

The surrounding offices should be carefully located by placing dots on or between the mile circles at the exact distance, and in the right direction from your office, and their names plainly written.

If it should be necessary to designate an office which is over 10 miles from your site, place the dot outside of the 10-mile circle, write the name of such office, and state its distance from your site.

Draw distinctly the railways, roads, rivers, and creeks.

M.

Post Office Department
FOURTH ASSISTANT POSTMASTER GENERAL

IMPORTANT.—A map or sketch showing the location of your post office must be submitted with the return of this paper. A printed map, such as prepared by the county or city engineer, is preferred, if it can be furnished without expense to the Department. Be sure, however, to mark on it the exact site of the post office, placing a small dot in the proper square or block and on the proper side of the street.

§ If a separate map cannot be furnished it is necessary to submit a sketch as described below.

These diagrams are furnished simply to make it easier to draw a sketch that will show correct distances from your post office.

SQUARE DIAGRAM

Use this diagram if your post office is located in an area described by section, township, and range, and you have filled in line 3 on the other side. Otherwise use the circular diagram.

Place a small dot representing your post office in the proper quarter-section and fill in the blanks for township and range numbers.

Then draw the following features: (Note that one-half inch on the paper equals 1 mile on the ground.)

- a. Adjacent post offices (show with small dots and name).
- b. Railroads (show by single line with cross marks; name).
- c. Highways (show by double lines close together and mark U. S. and State numbers; name in margin the post office to which each road leads).
- d. Rivers, creeks, lakes, etc. (show by wavy lines and name).
- e. County line (show by dashes).

CIRCULAR DIAGRAM

Use this diagram if your post office is NOT located in an area described by section, township, and range.

Let the dot in the center of the circle represent your post office.

Then draw the features a, b, c, d, and e, as described above. (Note the scale of this diagram: One-quarter inch equals 1 mile.)

IMPORTANT.—A map showing the location of your post office must be submitted with the return of this paper. A highway map such as prepared by State, county, or local agencies is preferred, if it can be furnished without expense to the Department. Be sure, however, to mark on it the exact site of the post office, placing a small dot in the proper square or block and on the proper side of the street.
If no map can be furnished it is necessary to draw a sketch on one of the diagrams below.

INSTRUCTIONS

These diagrams are furnished simply to make it easier to draw a sketch that will show correct distances from your post office.

SQUARE DIAGRAM

Use this diagram if your post office is located in an area described by section, township, and range, and you have filled in line 3 on the other side. Otherwise use the circular diagram.

Place a small dot representing your post office in the proper quarter-section and fill in the blanks for township and range numbers.

Then draw the following features:
(Note that one-half inch on the paper equals 1 mile on the ground.)

- Adjacent post offices (show with small dots and name).
- Railroads (show by single line with cross marks; name).
- Highways (show by double lines close together and mark U. S. and State numbers; name in margin the post office to which each road leads).
- Rivers, creeks, lakes, etc. (show by wavy lines and name).
- County line (show by dashes).

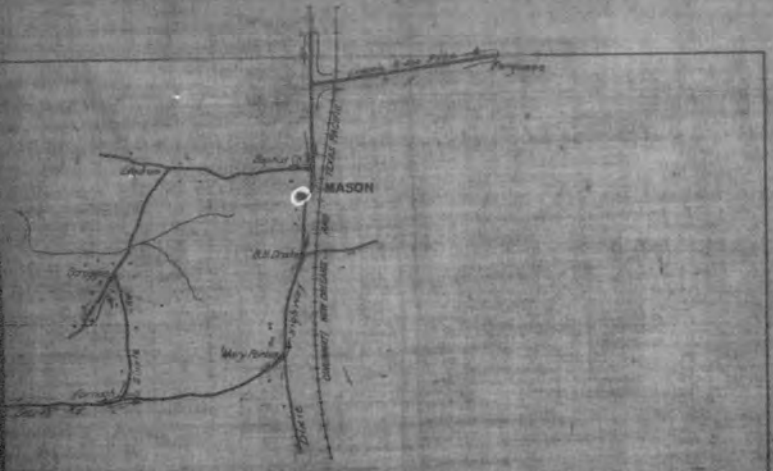

CIRCULAR DIAGRAM

Use this diagram if your post office is NOT located in an area described by section, township, and range.

Let the dot in the center of the circle represent your post office.

Then draw the features a, b, c, d, and e, as described above. (Note the scale of this diagram: One-quarter inch equals 1 mile.)
